SUMMARY

I am a motivated and experienced candidate with a strong background in front-end web development. Dedication and independence are signs of my commitment to excellence. Seeking an opportunity to work with a well funded startup or an established company located in a metro area alongside the East Coast.

TECHNICAL SKILLS

Ruby (Sinatra, Rails), JavaScript (Node, Express, jQuery), PHP, MySQL, PostgreSQL, SQLite3, HTML5/CSS3, Bootstrap, Github, Heroku, WordPress

WORK EXPERIENCE

General Assembly, New York, NY   **March 2015 – June 2015**
Web Development Immersive | Web Developer
- Studied and built web applications using Ruby and JavaScript languages using the latest technologies that adds value for the developer's future
- Demonstrated personal projects that enhance the developer ability to present in front of an audience in preparation for future employment
- Accomplished various of work assignments using different tools and technologies that provided hands on experience for the developer's skills and abilities

NLM Marketing (http://nlmmarketingfs.com), Remote   **January 2016 – August 2016**
Freelance Developer
- Developed a six page Ruby Sinatra website for a client that specializes in grocery goods using HTML5 and CSS3
- Provided responsiveness and clean design using Bootstrap and stock photography

PROJECTS

Name That Tube (https://namethattube.herokuapp.com) - *A Ruby on Rails trivia game application designed for users to test their knowledge of music, games, TV, and movies by identifying specific YouTube videos as their clue for answers.*
- Created methods inside the controllers using PostgreSQL queries that control the flow of the game
- Established a system that compares the selected answer against the correct answer using forms and Active Record queries
- Built HTML forms that render content from the controllers and database designed for the player's experience which helps control the gameplay with the use of Embedded Ruby

Music Forum (http://music-forum.herokuapp.com)– *A simple Node/Express application where users can post music related topics and comments according to their personal interests.*
- Established a CRUD system within the application that allows the users to easily manage content
- Developed and created SQLite queries that sync specific data into the views with the use of Mustache.js

EDUCATION

General Assembly   **2015**
